ABOUT

South Bay IT Solutions LLC is a Chula Vista-based technology firm that helps businesses and government agencies get the most out of their technology. We specialize in practical IT solutions—reliable networks, custom websites, document digitization, and the daily systems work that keeps an organization running.

As a DVBE-certified small business led by a 100% service-disabled veteran, we bring a level of personal accountability that national contractors can't match. Hardware procurement, office setup, web development, DNS, SSL, scanning, support—you call one number, you get one person who knows your environment.

CORE COMPETENCIES

- 01 Web Design & Development**
Custom sites and apps built for accessibility and performance. Domain, DNS, SSL, hosting, and ongoing maintenance handled end-to-end.
- 02 IT Procurement & Deployment**
Workstations, laptops, peripherals sourced at competitive pricing. Imaged, configured, asset-tagged, and deployed ready to use on day one.
- 03 Document Digitization**
High-volume scanning of paper records into organized, searchable archives. PDF remediation, file cleanup, and secure long-term storage.
- 04 Network & Infrastructure**
WiFi, routers, switches, structured cabling—designed, installed, and maintained. Fast, reliable, and secure connectivity for any site.
- 05 Support & Maintenance**
Help desk, security patching, hardware repair, printer setup, and the day-to-day troubleshooting that keeps offices productive.
- 06 IT Consulting**
Technology audits, system planning, and honest guidance to help you make smart decisions—no jargon, no upselling, no surprises.

WHY WORK WITH US

- **Veteran-owned & accountable.** Military discipline on every project. When we commit to a deadline, we meet it.
- **Local & on-site responsive.** Based in Chula Vista — fast in-person support across San Diego County.
- **Plain English, every time.** No jargon. You always know what's happening and why.
- **Small business, big capability.** One dedicated partner who knows your setup — not a rotating support queue.
